Subject Index

Algal growth
  Growth limiting nutrient equations 212
  Growth regulation 192–194
  Light and nutrient interaction 194–197, 207, 214, 215
  Law of the minimum 156
  Limiting nutrient 200
  Nitrogen/Phosphorus ratio 10, 201
  Phosphorus and carbon interactions 204
  Phosphorus and iron interactions 204
  Phosphorus and selenium interactions 204
  Phosphorus and silica interactions 201
  Population growth rate (μ) 192, 193, 212, 213
  Temperature and algal growth 198, 199
  Temperature and nutrient interaction 197, 207, 214, 215
  Yield 205, 206, 207
Algal phosphorus metabolism
  Internal phosphorus content 181, 194, 212, 297
  Phosphorus starvation 181
  Phosphate transport 181
  Transport energy source 181
  Uptake kinetics 180, 181, 183, 187
  Uptake regulation 181
Aluminium-bound phosphorus 30, 70, 92, 93
Analytical phosphorus determination, see Phosphate analysis, Phosphorus forms in sediments and Phosphorus forms in water
Apatite phosphorus 20, 29, 30, 70, 74, 92, 93, 137–139
ATP 147, 179, 181, 191

Bacterial phosphorus metabolism
  Excretion 179, 185, 186
  Internal phosphorus content 222
  Phosphate transport 178, 185
  Phosphorus uptake mechanisms 178, 185
  Transport energy source 181
  Transport protein 178
  Uptake regulation 179, 186, 187
Bioassay of phosphorus availability 133–155
Bioavailability of phosphorus
  Apatite-phosphorus 137, 138, 139
  ATP 147, 179, 181, 191
  Dissolved reactive phosphorus 141
  DNA 80, 147
  High molecular weight phosphorus 79, 147, 148
  Immediately available phosphorus 142, 144–147
  Low molecular weight phosphorus 80, 147, 148
  Non-apatite inorganic phosphorus 137, 138, 139
  NaOH-extractable phosphorus 137, 138, 139
  NTA-extractable phosphorus 137, 138, 139
  Potentially available phosphorus 142
  Total dissolved phosphorus 141
  Total phosphorus 137, 138, 139
Bioturbation 124

Calcium-bound phosphorus 20, 30, 93, 117, 137–139
Carbon/nitrogen/phosphorus-ratio 10
Carbon limitation theory 184
Carbon-phosphorus controversy 13
Colloidal phosphorus 62, 63, 186
Competition for phosphate between algae and bacteria 182, 221, 222

Decomposition, see Mineralization
Diffusion of phosphorus in, and from sediments 120–126, 237
Dissolved phosphorus
  Analytical determination 76–90
  Bioavailability 141, 147, 148
  In interstitial water 111
Dissolved reactive phosphorus 76, 77, 141
DNA 80, 147

Ecosystem phosphorus turnover 14, 35, 42, 285–301, 321–334
  Animal influence 267–281, 216–220
  Littoral zone influence 256–261
  Models of ecosystems 285–301
  Planktonic community interactions 211–223
  Sediment influence 229–241
Eutrophication 14, 35, 42, 245, 246, 285–301, 321–334

Fish
  Impact on ecosystem phosphorus cycling 276–281
  Phosphorus excretion 275
  Predation by 276–278

Humic matter 23, 213, 214

Interstitial water 103–128
  Diffusion coefficient 122
  Phosphorus concentrations 111
  Sampling of 104
  Separation from particles 104–107
  Vertical phosphorus gradient 112
Iron-bound phosphorus 20, 30, 70, 117, 137–139

Limiting nutrient, see Algal growth
Loading of phosphorus, see Phosphorus loading
Luxury consumption 13

Macrophytes
  Decomposition 249, 250, 254
  Effects of harvesting 259
  Internal phosphorus translocation 247
  Nutrient pumping 249, 253
  Nutrient release 253, 254, 256
  Nutrient sources 250, 255
  Phosphorus content 246–248
  Phosphorus uptake 246, 250
  Refractory phosphorus fraction 250
Mineralization
  Bacteria mediated 68, 69, 235–237
  Bentic evertebrate phosphorus turnover 270, 271, 273
  Fish phosphorus turnover 275
  Phosphatase mediated phosphorus turnover 170–171
  Refractory fraction 69, 235
  Zooplankton phosphorus turnover 268
Minerals, see Phosphate minerals
Mining of phosphate minerals 20
Models of responses to phosphorus loading
  Dynamic models 295–300
  Empirical models 286, 294
  Hydraulic dilution models 296
  Loading vs. phosphorus concentration models 285–291, 300
  Phosphorus retention 286, 287
  Phosphorus sedimentation rate 288
  Phosphorus vs. chlorophyll models 291–294
Molybdate reactive phosphorus 46, see also Dissolved reactive phosphorus

NaOH-extractable phosphorus 71, 74, 92, 93, 137
Nitrogen/phosphorus ratio, see algal growth
Non-apatite inorganic phosphorus 70, 74, 137–139, 231
NTA-extractable phosphorus 71, 92, 95, 137–139
Nutrient interactions, see Algal growth

Orthophosphate
  Analytical determination, see Phosphate analysis
  Biological uptake 178–187

^{32}P, ^{33}P, see Radioactive phosphorus
Persson-Jansson index 337
Phosphatases 157–172
  Acid 162–164
  Alcaline 162–164
  Algal phosphatases 161
  As phosphorus deficiency indicator 167–169
  Bacterial phosphatases 160
  Determination of activity 159, 160
  In situ activity 170
  Km of 166
  regulation of activity 164
  Stability 166
  Synthesis 164
  Zooplankton phosphatases 162
Phosphate analysis 45–57, see also Phosphorus forms in water
  enzymatic determination 52, 53, 68
  extraction of particulate phosphorus 67
  Formazan method 53
  Interferenses 50
  Ion association complexes 51
  Molybdate complex 47
  Oxidative digestion 64
  Radiobioassay 54, 144–147
Phosphate fertilizer 21
Phosphate minerals
  Analytical identification of 99
  Apatite phosphorus 20, 99
  Phosphatic schale 20
  Phosphorites 20
  Strengite 99
  Variscite 99
  Vivianite 99
  Wavellite 99
Phosphate sorption, see Sorption of phosphate
Phosphate uptake in algae, see Algal phosphorus metabolism
  Phosphate uptake in bacteria, see Bacterial phosphorus metabolism
Phosphorus forms in sediments 69–71, 91–100, 231
  Al-bound phosphorus 30, 70, 92, 93
  Apatite phosphorus 20, 29, 30, 70, 74, 92, 93, 137
  Ca-bound phosphorus 20, 30, 93, 117
  CDB-extractable phosphorus 70, 92, 93, 96
  Exchangeable phosphorus 91, 95
  Fe-bound phosphorus 20, 30, 70, 117
  HCl-extractable phosphorus 92, 93, 94, 231
  Minerals 27, 68, 69, 99
  Na HCO_3-extractable 94
  NaOH-extractable phosphorus 71, 74, 92, 93, 137
  NH_4-Acetate-extractable phosphorus 94
  NH_4Cl-extractable phosphorus 71, 92, 93, 94

Non apatite inorganic phosphorus 70, 74, 137, 231
NTA-extractable 71, 92, 95, 137
Organic phosphorus 27, 28, 29, 30
Phosphate precipitates 27, 68, 230
Reductant soluble phosphorus 30, 93, see also CDB extractable phosphorus
Residual phosphorus 23, 92, 97, 231
Sorbed phosphorus, see Sorption of phosphorus
Total phosphorus 97
Water extractable phosphorus 92–94
Phosphorus forms in water
Analytical determination of 27, 45–57, 61–85
Biologically available phosphorus 28, 133–153, see also Bioavailability of phosphorus
Colloidal phosphorus 62, 63, 186
Condensed phosphate 21, 77
Detritus phosphorus 66, 70
Dissolved inorganic phosphorus 76, 77
Dissolved organic phosphorus 76, 78–85
Dissolved reactive phosphorus 76, 77, 141
Dissolved unreactive phosphorus 77
DNA 80
High molecular weight phosphorus 79, 147, 148
Immediately available phosphorus 80
Low molecular weight phosphorus 80–147, 148
Metaphosphate 27, 77
Molybdate reactive phosphorus 46, see also Dissolved reactive phosphorus
Orthophosphate 45–57
Particulate phosphorus 27, 65, 68, 69, see also Phosphorus forms in sediments
Phosphoesters 82
Polyphosphate 27, 68, 77, 181
RNA 68
Soluble reactive phosphorus 27, 36, see also Dissolved reactive phosphorus
Soluble unreactive phosphorus 27, see also Dissolved unreactive phosphorus
Surplus phosphorus 74
Terminology 27
Total dissolved phosphorus 63, 77
Total phosphorus 64
XP 82, 186
Phosphorus loading
From arable land 27, 39
From detergents 306
From rivers 36, 37
From sewage 26, 306, 321, 322
From soil 25
From the atmosphere 25, 26, 41
Internal loading 232–234, 270–281, 297–300
Loading vs. concentration models 285–291, 300
Natural background 36–42
Polyphosphates 27, 68, 77, 181
Phytoplankton
Biomass 211
Bloom 220, 221
Carrying capacity 212, 215
Chlorophyll 211, 291
Elimination 215, 216, 217
Grazing on 215, 217, 218
Life strategies 220
Phosphorus vs. chlorophyll models 212, 291–294
Primary productivity 213, 214
Primary productivity/biomass ratio 215
Sedimentation 65, 219, 288
Point sources 305–317, 321–323

Radioactive phosphorus 12, 70, 82, 80, 81, 179, 182, 184, 185, 186, 187, 235, 253, 268
Redfield ratio 10
Redox potential, see Sediment phosphorus release
Regeneration of phosphate see Mineralization
RNA 68

Sediment dating 12
Sediment phosphorus
Concentrations 29, 97, 11, 231
Fractions, see Phosphorus forms in sediment
Mobility of 32, 112, 120–127, see also Sediment phosphorus release
Sediment yield 36, 38
Speciation, see Phosphorus forms in sediment
Vertical distribution 29, 31, 112
Sediment phosphorus release 229–241, 270–281
Bioturbation 233, 270–275
Diffusion 120, 233
Gas ebullition 233
Influence of macrophytes 249, 250, 253, 254
Microbial processes 232, 234, 238
pH dependance 232
Redox dependance 232, 238, 239
Transport 233
Turbulence 233, 234
Sewage diversion 307
Soil phosphorus 20
Soluble reactive phosphorus 27, 36, see also Dissolved reactive phosphorus
Soluble unreactive phosphorus 27, see also Dissolved unreactive phosphorus
Sorption of phosphate 22, 115–117, 230
By aluminum silicates 22, 23, 24, 116
By carbonates 23, 116
By humus 23
By iron hydroxides 22, 24, 70, 116
Chemisorption 22
In clay 22, 23
Isotherms 24, 117
Kinetic models 25
Ligand exchange 22, 232
pH dependance 22, 23, 16
Redox potential dependance 23, 116
Temperature dependance 24

Temperature
  Algal growth 198, 199
  Algal nutrient utilization 197, 207, 214, 215
Total dissolved phosphorus 63, 77
Total phosphorus
  Analytical determination of 64
  Bioavailability 137–139
  In interstitial water 111
  In sediments 97
Tracer, see Radioactive phosphorus
Wastewater treatment 307–317
Zooplankton
  Filtration rate 215
  Grazing 215, 217, 218, 268
  Phosphorus excretion 268
  Predation on 215, 276–278
  Vertical phosphorus transport 270
